

## Sort 'Em Out

Print this page out

These columns have items involved in Lab Animal Science. There are 16 groups of 3 related items. Your job is to sort them out so that the groups include the items only once. The trick is that some items can be used in more than one list, but only **one arrangement** of all the items will work.

**GO FOR IT!!!**

Spider Monkey	Water	Cage	Investigator
Follow regulations	Scalpel	Feline leukemia virus	Fur
Ticks	Baboon	Humane treatment	Sutures
Behavior	Lungs	Rats	Ear mites
Water bottle	Hamster	Food	Diseases
Health observation	Fleas	Opossum	Mouse hepatitis virus
Armadillo	Flask	Microscope	Achieve Certification
Mice	Feeder/feed bowl	Veterinary technician	Bats
Claws	Gain Experience	Brain	Check Room Temperature
Formal Education	Medicine	Ears	Stomach
Canine distemper	Tail	Avoid animal discomfort	Vitamins
Veterinarian	Recordkeeping	Teeth	Chimpanzee
