

Name _____

Scientific Criss-Cross

Many scientific and medical terms are made up of prefixes, stems, and suffixes derived from a variety of language sources including Latin, Old English, and Greek. The varied combinations of these units creates many terms you may hear at your doctor's office or in your science classroom. Here are some examples:

Samples: Cytology = cyto (cell) + logy (study of) = the study of cells
 Biology = bio (life) + logy (study of) = the study of life
 Pseudopod = pseudo (false) + pod (foot) = a false foot (Remember the Amoeba!)

Instructions: Using the prefixes, stems, and suffixes at the bottom of the page, complete the crossword puzzle below. Some of the word parts may be used more than once and some may not be used at all. To help you with spelling, a list of possible answers is provided.
