Introduction

In the old days, “Life” magazines featured stories about the latest advancements in science and technology. Today, “Life” magazines are a thing of the past, but the advancements in science and technology continue to be fascinating.

The “Everyday of the Year” classroom activity is a multi-purposed resource that can be tailored to meet the needs of students in grades 4-12. The three main objectives of the activity are:

1. To increase student appreciation of science and technology.
2. To provide students with the opportunity to learn about the latest advancements in science and technology.
3. To provide teachers with a convenient and engaging way to teach science and technology.

Background

The “Everyday of the Year” classroom activity is designed for middle and high school students who are interested in science and technology. The activity is comprised of a series of daily challenges that are designed to encourage students to think critically and creatively about the latest advancements in science and technology.
